

Size10

up to 31.5 MPa

up to 120L/min

Features:

- Direct actuated directional spool valve with hand lever
- With spring return or detent, optional
- For subplate mounting
- Porting pattern to Din 24 340 form A, ISO 4401 and CETOP-RP 121H

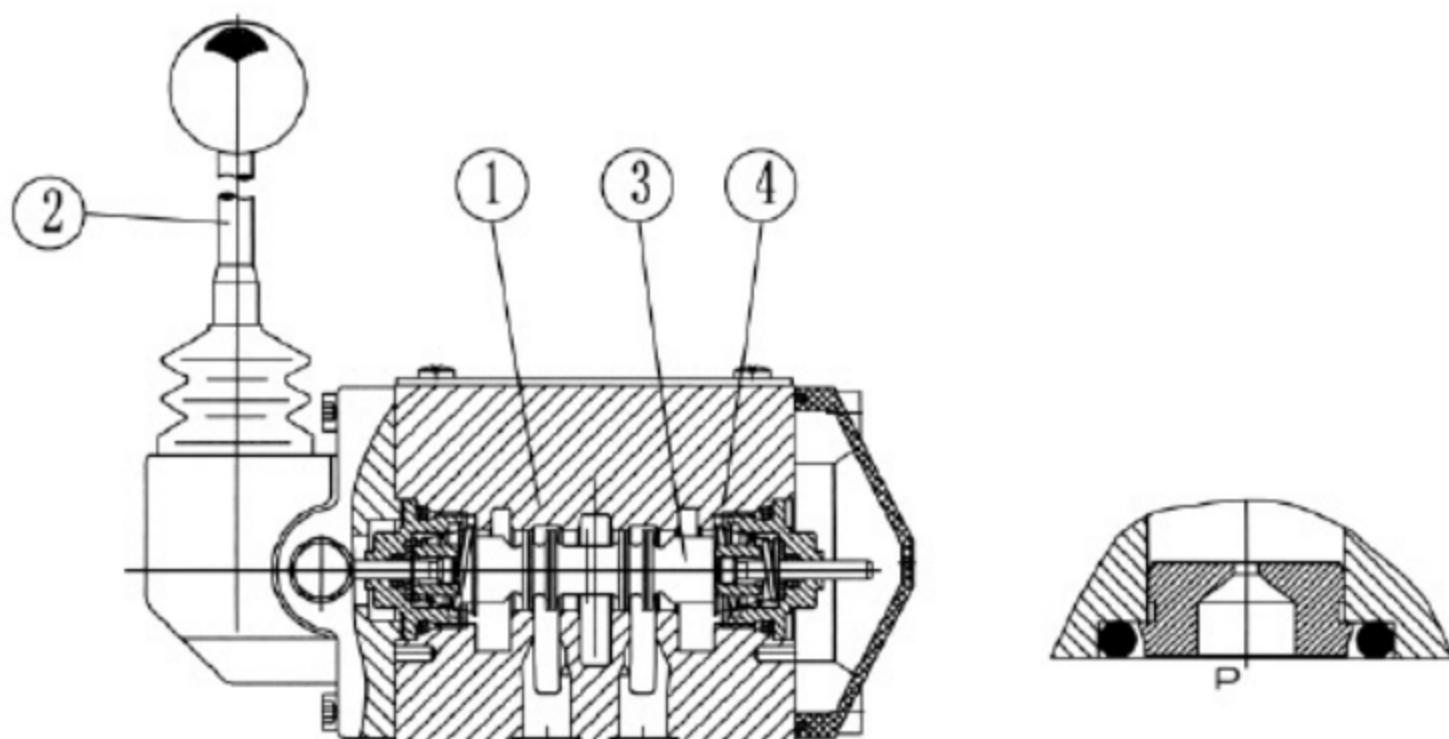

Function,section

The type WMM valves are hand lever actuated directional spool valves. They control the start, stop and direction of a flow.

The directional valves basically comprise of a housing (1), hand lever(2), control pool (3), as well as one or two return springs (4).In the unoperated condition the control spool (3) is held in the neutral or its initial position by the return springs (4). The control spool(3) is actuated via the hand lever (2), this acts via a joint and the pin(5) directly onto the control spool (3). The spool is thereby moved out of its rest position into its required switched position.After the hand lever (2) has been returned to the switched position zero, the spool (3) is returned to the neutral position via the return springs (4).

Type H-4WMM..../F.. (with detent)

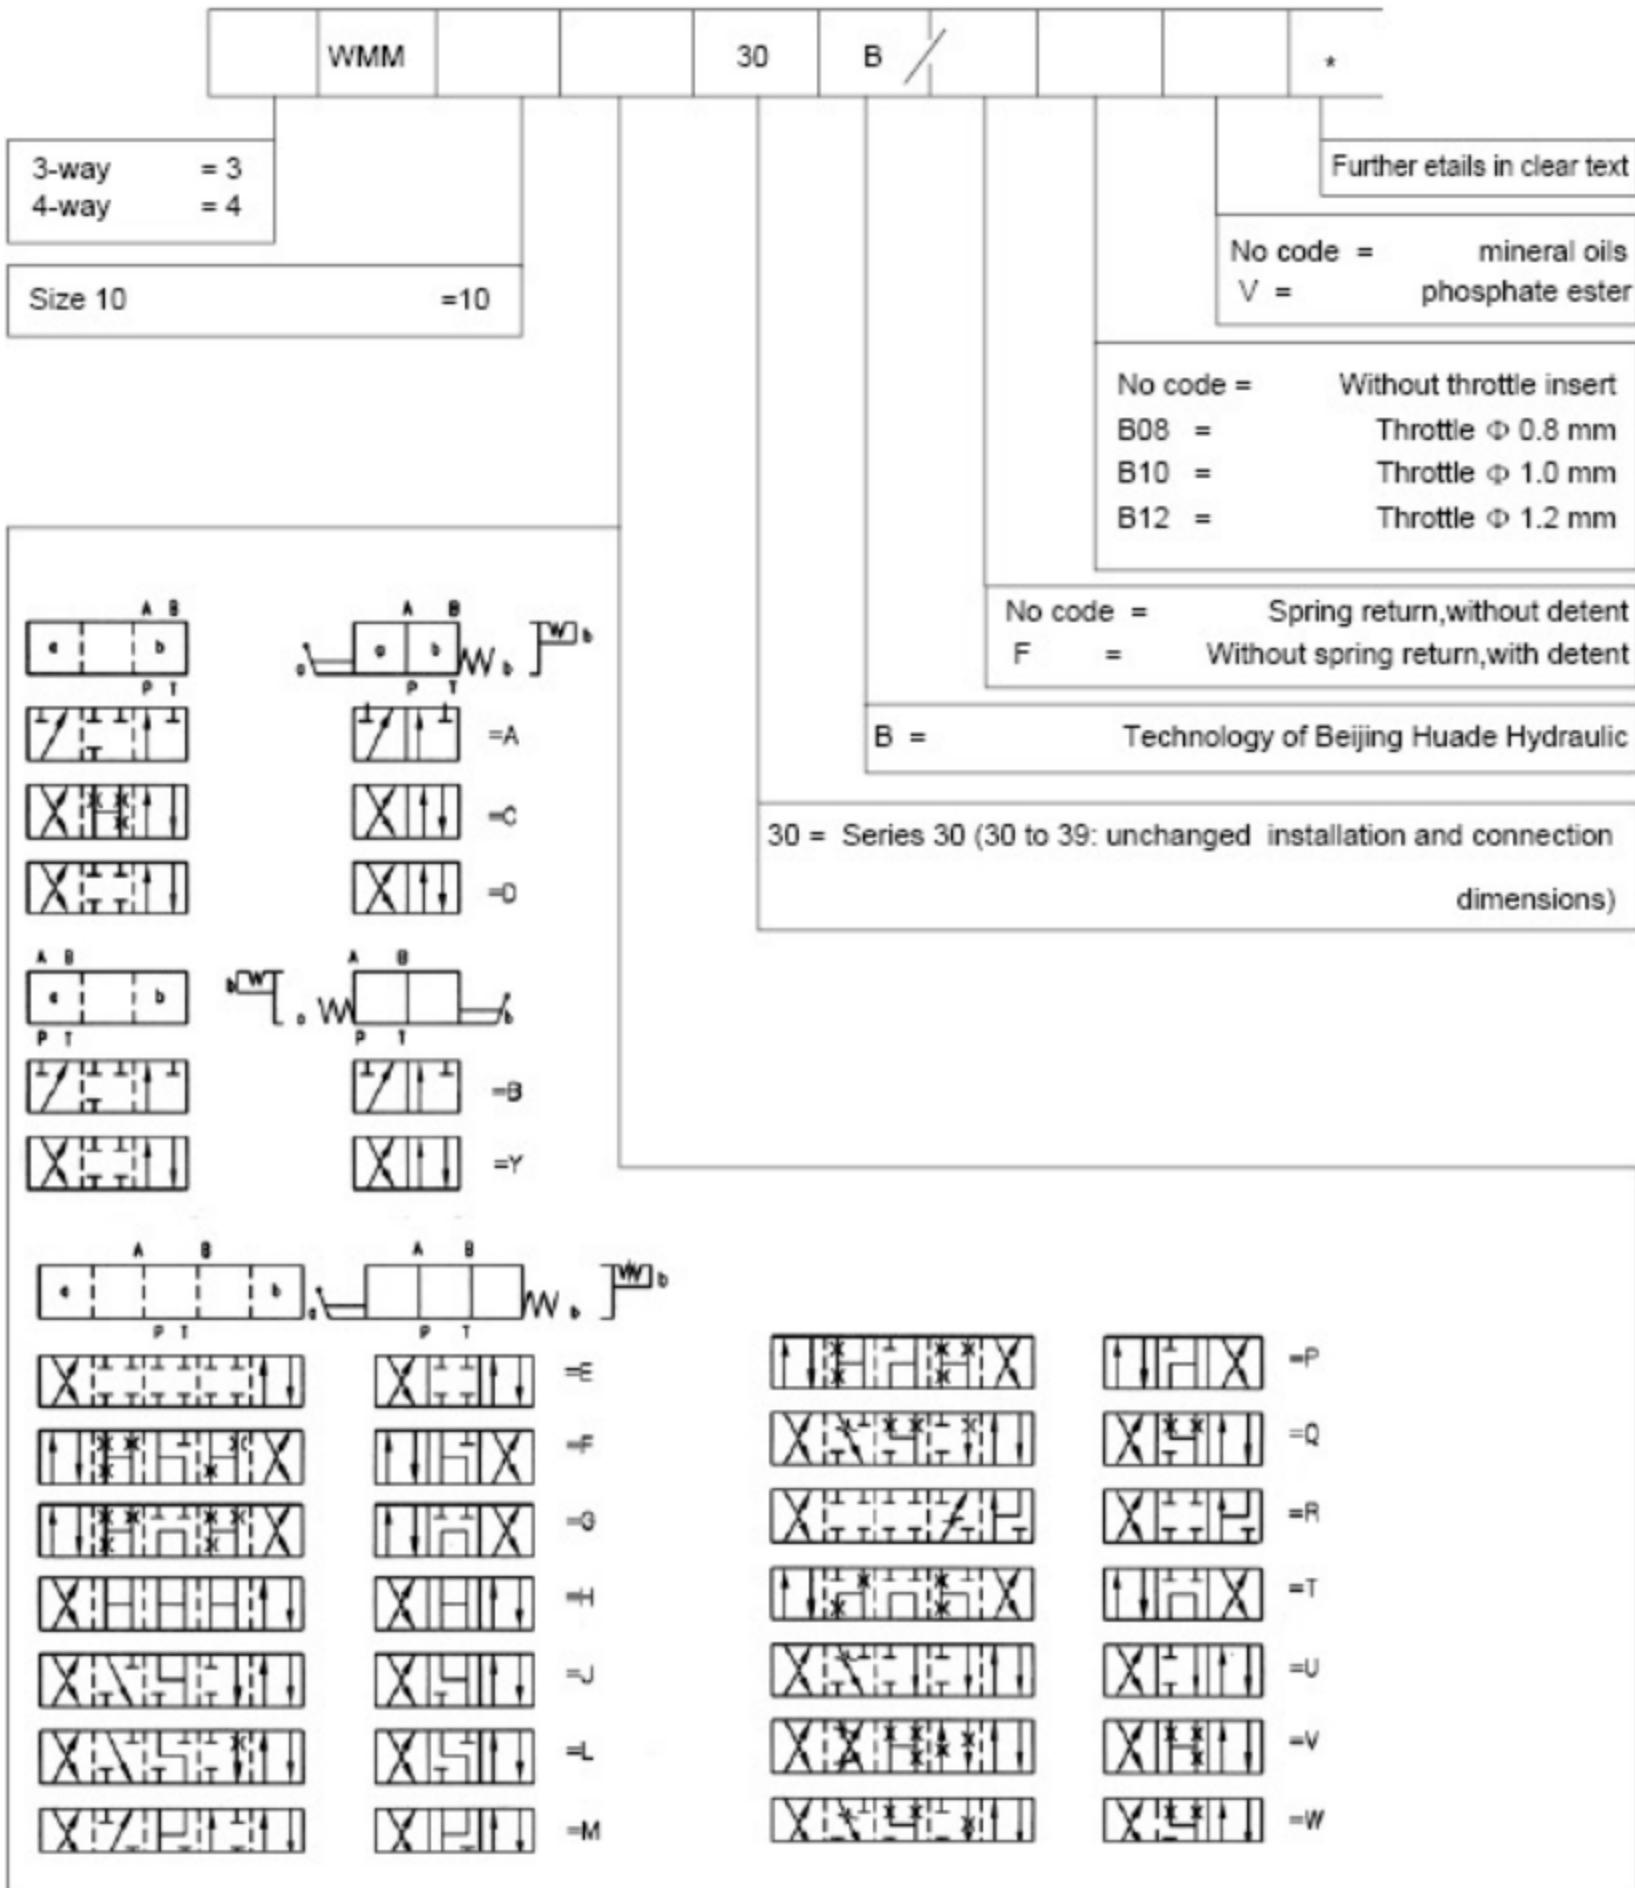

These valves are either 2 or 3 position directional control valves which are fitted with a detent , which operates in all of the switched positions.

Type 4WMM

Cartridge throttle

Ordering details

Example:

Spool E on side "a", Order example:...EA...

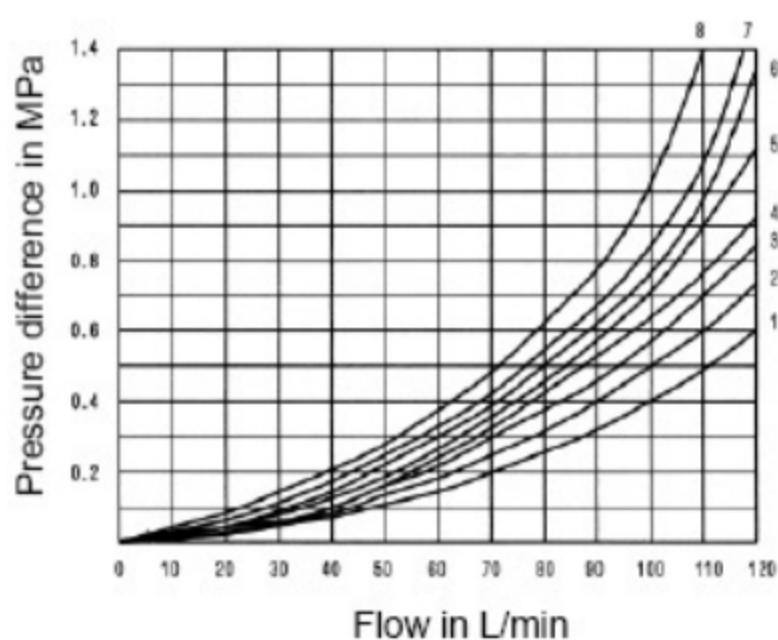

Spool E on side "b". Order example:...EB...

Technical data (For applications outside these parameters, please consult us!)

Size	10	
Maximum working pressure	port A, B, P (MPa)	to 31.5
	port T (MPa)	to 15
Maximum flow	(L/min)	
Flow cross section (control position 0)	for symbol Q, 6% of nominal cross section for symbol W, 3% of nominal cross section	
Pressure fluid	Mineral oils(for NBR seal) or phosphate ester(for FPM seal)	
Fluid temperature range (°C)	-30~+80	
Viscosity range (mm²/s)	2.8~500	
Weight (kg)	approx.3.3	
Control power on handle (N)	with detent approx.16~23 without detent approx.20~27	

Characteristic curves (measured at $v = 41 \text{ mm}^2/\text{s}$ and $t = 50^\circ\text{C}$)
